ALEXANDROS GARMENT TREATMENTS  
was founded by true colour enthusiasts

## about

The company ALEXANDROS GARMENT TREATMENTS was founded in 1972 by true colour enthusiasts as a small family firm in the field of textile and specifically in the washing and dyeing of ready-made clothes. Since then, the company has become a key player in the fashion district and a pioneer in developments regarding processing of jeans and dyeing of knitted clothes.

The company's headquarters are based in the industrial park of Oreokastro in a private property of 20 quarter acres and the industrial area comprises of 7,000 square metres and there is a workforce counting from 45 to 60 employees working in the company on a daily basis.

## vision

Our aim is to preserve high specifications in our offered services and to develop our activities in new markets abroad. With fresh eyes we gather information about new trends and innovations to demonstrate our own techniques and unique services.

# man & machine /

dyeing and specialized processing with the combination of usage of automatised machines (ROBOT) and well-trained personnel.

Developments in the fashion industry are continuously changing and progressing.

Therefore, our research and development department forms the focus of our interest.

The team dealing with this field is continuously acquiring information about new techniques and, consequently, applies them in order to create innovative results and open new horizons in fashion trends. Our basic principle is that everything starts at the testing laboratory and continues to develop in the production procedure.

The company develops and carries out a wide range of processing such as washing, stonewashing, dyeing and specialized processing with the combination of usage of automatised machines (ROBOT) and well-trained personnel.

# industrial washing & dyeing /

We are always able to meet the latest fashion requirements and our clients' needs.

## facilities

Our large daily production capacity guarantees the fastest possible service to the largest fashion brands that trust us. In addition, the company offers its clients a full packaging service, as well as storage options from the logistics department.

The love for what we do, correct organization, investments in high-tech mechanical equipment, our constant involvement in the developments taking place in youth fashion and the constant training in new technologies of our working and technical staff have turned our company into the most reliable force in the sector of industrial washing and dyeing. We are always able to meet the latest fashion requirements and our clients' needs.

# eco friendly

system of ecological management and control according to the European regulation 1221/2009 (EMAS III) which has been certified by TUV

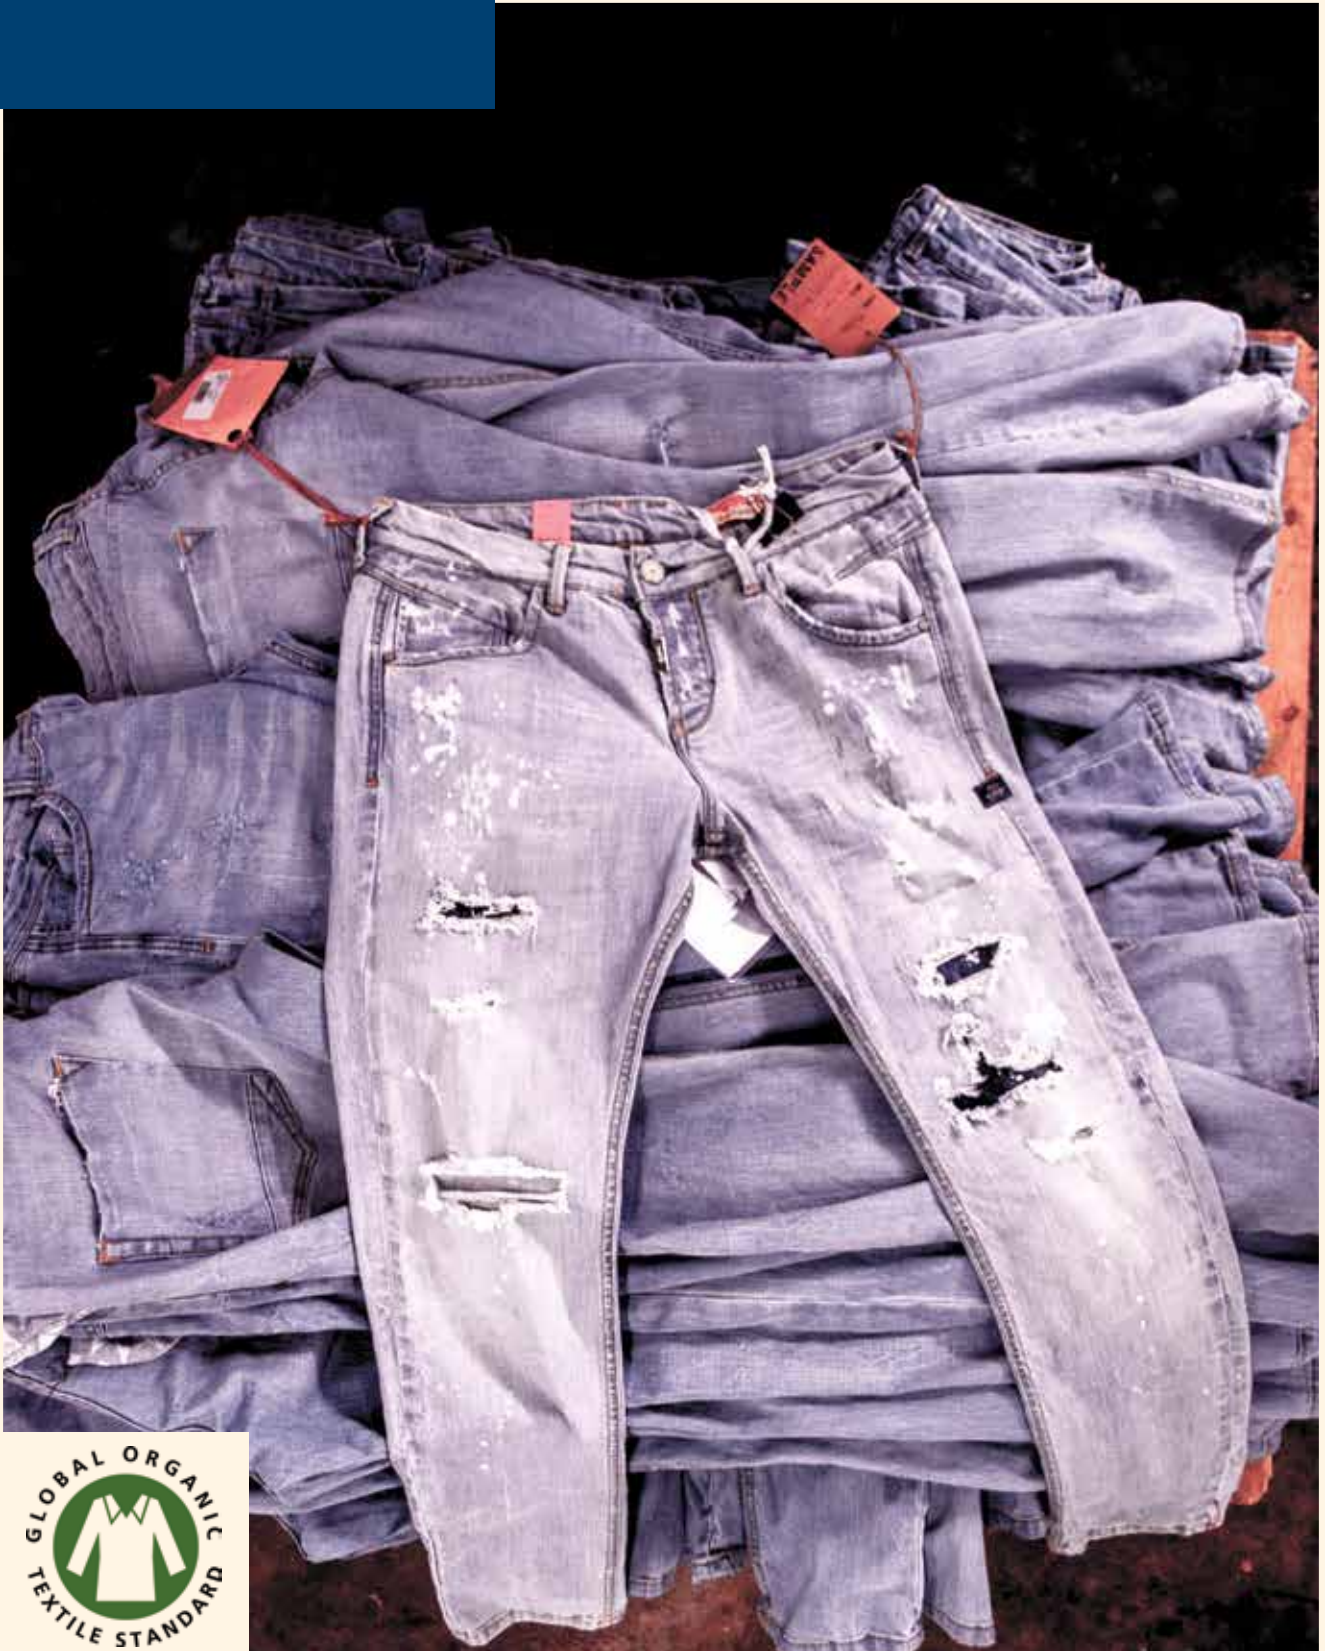

Respect to the environment constitutes a timeless commitment for our children's future. Our sensitivity towards this direction has become obvious with the function of a modern sewerage for a large load of waste, which is constantly monitored, the use of natural gas for the required energy of the factory with additional energy saving systems and the recycling of liquid and solid waste, too.

Since the year 2005, the company has installed and has been operating a system of ecological management and control according to the European regulation 1221/2009 (EMAS III) which has been certified by the firm TUV and has been registered in the management book of ecological systems and control of the Ministry of Environment, Physical Planning and Public Works.

# Quality Control & Packaging

the company offers its clients a full packaging service, as well as storage options from the logistics department.
